DETAILED ACTION

Applicant's arguments with respect to the claims have been considered but are moot in view of the new ground(s) of rejection.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 2 and 16 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. There is no reference frame for "eccentric". Relative to what structure is the mechanism eccentric?

Claim Rejections - 35 USC § 102

Claims 1, 2, 15 and 16 are rejected under 35 U.S.C. 102(b) as being anticipated by Crane (US 972,163). Crane discloses a linear motor (steam end) having an element 8 which moves axially. The air end is formed by a piston and cylinder. The piston has a piston rod 7. An eccentric mechanism (cranks 3, 4, and links 5, 6) connects the element 8 to the piston rod 7. The mechanism acts as a motion stop for the linear motor.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Claims 3 to 14 and 17 to 28 stand withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected species.
